

Student Spotlight

Chris Danis & Brian Rogan

“Brian and Chris did exceptional work in creating an entire robot lab from scratch. They not only physically assembled the robots, they built an entire software infrastructure on top of it.” -Professor Ramin Zabih

Together with Professor Zabih, they developed the CS100R curriculum and technology platform, including the Robot Hardware, Software, and Lab Infrastructure for the class.

Chris has also served as lead programmer on Cubesat and as the lead consultant at the ACCEL lab for four years.

Brian is a founding member and Group Leader of CUAir. He also worked on projects related to energy minimization techniques.

Among the many other projects they were involved with at Cornell, both were founding members and leaders of a project with Professor Dan Huttenlocher to enable mobile autonomous robots to map and classify the environment around them.

“The energy and enthusiasm that Brian and Chris brought to the Buppii P2P file backup project really helped bring it together.” -Professor Paul Francis

Chris graduated with a BS, May '06 and will be attaining his MEng, in May '07.

Brian graduated with a BA, Magna Cum Laude, May '06 and MEng, Jan '07 and will work at Google.
